REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Leupin et al, WO 99/14295, discloses a laundry detergent composition comprising a hydrophobically modified cellulose material (see page 4, line 28-page 7, line 7), 1-80% by weight of a deterative surfactant, such as a combination of anionic and nonionic surfactants (see page 7, line 21-page 9, line 24), and 0.1-80% by weight of a builder, such as silicates and aluminosilicates (see page 9, line 25-page 10, line 24). It is further taught by Leupin et al that the laundry detergent composition can be in granular and compact form (see page 16, lines 1-17). However, patentee differs from applicant in that Leupin et al does not teach or suggest in general a detergent composition that contains a dry-added particulate hydrophobically modified cellulosic material that has a particle size below 1000 microns, in combination with a binder selected from the group consisting of a polyacrylate and a copolymer of maleic acid and acrylic acid, as required by applicant in the instant invention.

Accordingly, the claims viewed as a whole would not have been obvious to one of ordinary skill in the art at the time of the invention after viewing the prior art of record.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
